

## Digital Systems 2021-2022

OSRAM brings together outstanding future-proof LED modules, drivers and control for professional lighting partners.

Light is OSRAM

**OSRAM**

# Creating the future of light with OSRAM

For more than 110 years, the trademark OSRAM stands for innovative and sustainable development in the global lighting market. Today, OSRAM is one of the world's largest suppliers of products and solutions for a wide range of customer requirements - from lamps and modules to luminaires and high-efficiency light management systems.

OSRAM focuses all its resources on the subject of light, actively supporting its customers in making the best choices to meet their individual requirements.

With more than 24000 employees in around 120 countries, OSRAM develops tailor-made solutions to cover the specific needs of its customers.

OSRAM's energy efficient indoor and outdoor luminaires offer an outstanding performance in every respect. The service life of our LED Luminaires is upto 25 times longer than that of luminaires equipped with conventional incandescent lamps. Our mercury free LED luminaires do not only lower CO<sub>2</sub> emissions, they also help to prevent waste.

You have the idea – we have  
the components and systems!

Develop tomorrow's lighting solutions with innovative LED components  
and LED systems from OSRAM Digital Lighting Systems.

## OSRAM ensures that your lighting ideas become reality

No matter what you are planning, OSRAM Digital Lighting Systems enables you to bring all your LED projects to a successful conclusion – simply and efficiently. We offer a broad range of components from a single source – LED drivers, modules and light management systems (LMS) – not to mention complete systems for every type of LED luminaire and nearly every application.

You can completely rely on OSRAM. We offer fast access to a very wide and innovative product portfolio of a consistently high quality. As our partner, you will profit from more than 20 years of experience in LED lighting technology, a powerful global brand with comprehensive services and individual support provided before, during and after your projects

## OSRAM Digital Lighting Systems' wide range of products and services helps you give your customers what they want:

### Design flexibility

Complete component portfolio, created with maximum compatibility and design freedom in mind, individual design-in support and customer-specific mass production.

### User friendliness

Simple selection, configuration, installation and use, reliable operations for the product's entire lifespan.

### Stability

Proven brand quality, long-life, efficient products, optimally coordinated systems.

### Planning security

Complexity and risk reduction, simple and efficient warehousing.

### OSRAM guarantee

Three or five years guarantee for our products and systems (details and general requirements: [www.osram.com/guarantee](http://www.osram.com/guarantee))

## Digitalize your installation

OSRAM Digital Systems has produced electronic lighting components for over 30 years. As with many growing businesses, our portfolio has evolved to offer a wide range of reliable lighting electronics and control systems. We enable our customers to deliver high-quality lighting solutions, and help our partners successfully transition from the traditional lighting world to the LED world.

Looking at the upcoming transformation towards digital lighting and IoT, OSRAM DS will be the same reliable partner, developing and delivering communication modules, smart control gear, sensors and cloud solutions which will give our customers peace of mind about emerging IoT, cloud services and other data and communication technologies and standards. As a lighting specialist with a vast experience in networked solutions, gathering and analyzing lighting data; we create solutions our customers can safely design into their luminaires or projects.

Global megatrends such as urbanization, digitalization, sustainability and ageing populations are driving the

need for smart infrastructures, smart buildings and smarter working spaces. This creates a variety of social and technological requirements which can no longer be fulfilled by treating building technologies as separate units. We are looking beyond lighting to provide more value with technologies such as DEXAL™ – a digital, streamlined solution that enables luminaire manufacturers to provide smart luminaires that offer data exchange and sensor connection – and HubSense® Wireless Bluetooth Mesh lighting solution with intuitive commissioning, Dali Pro 2 IOT, which unlock the potential of Internet of things in connecting to our “Lightelligence\*” cloud system.

Across each of the different verticals we serve – industry (including warehouses), outdoor lighting, offices, education (schools), hospitals, retail and hospitality lighting; we see one or more of these megatrends influencing the use of upcoming technologies. Our role is to fully utilize the value technology can offer in each application, where stakeholders in these segments look to technology to solve their pain-points.

We therefore understand that individual solutions are necessary and must be adaptable, and we are here to help our customers find these solutions together. We see strong future trends in the use of wireless technologies and IoT as the next level of optimizing end-user applications and satisfaction. We also understand the desire for consumer applications driven from smartphones, and for using digital tools to make our lives easier, in everything we do. These trends impact the DS business and are the basis of our development of technology solutions and services to help our partners in the changing world of lighting. Digitalization demands from us but also allows us to do more and offer more than lighting. Data gathered with lighting technology can be made available for application-specific needs, enhancing the world around us.

OSRAM DS is developing and will provide the enabling field technology components (drivers,

sensors, light engines, controls) and systems; and also the platform, digital services (algorithms) and professional services from application support to installation, commissioning and maintenance services.

We want to take the guess work out of the design and component choices, to enable our customers to focus on their business. Whatever the individual or overall project need, we are committed to be the partner of choice and build our customers' visions with them. We support all our customers in fulfilling the high demands of the lighting market. This also includes the continued availability of traditional lighting controls for replacement purposes.

We look forward to working with you and taking the step to digitization and the world of IoT together.

[www.osram.com/ds](http://www.osram.com/ds)

# Creating the future of light

Our comprehensive expertise in the lighting industry demonstrates our passion for light. We have been re-inventing light for more than 110 years to provide a broad, state-of-the-art product portfolio that makes it simple for our customers to serve their own customers.

We are more than our customers' partner for their current needs – OSRAM understands the challenges and opportunities of innovative lighting in the future and is driving the technological change in the lighting industry.

Facilitated by trends such as digitalization and connectivity, light will play a fundamental role in our lives in the future that goes beyond illumination – for instance in areas such as health, mobility, security and data transmission. Smart and connected systems will make our homes and cities more comfortable, secure and energy-efficient. OSRAM is already setting significant trends with regard to technological changes in the lighting market that improve quality of life.

As one of the leading light manufacturers in the world, OSRAM can leverage over a century of industry

expertise in this market.

Primarily focused on semiconductor-based technologies, our products are used in highly diverse applications ranging from virtual reality to autonomous driving and from smartphones to connected lighting solutions in buildings and cities.

For more information, please go to [www.osram.com](http://www.osram.com)

## Innovative and compliant

In addition to the general legal requirements, statutory and regulatory requirements relating to technical regulations, norms and standards are the main provisions of relevance to the OSRAM Licht Group. The last few years have been marked by comprehensive regulatory change around the world. This is a continuing trend. In view of new regulatory requirements, we are continuously modifying the portfolio of the affected products, often improving products at an early stage and thus taking on a leading role in the lighting industry.

Since the autumn of 2015, the European Commission has been working on further tightening the Energy Efficiency Regulation. Among other things, the focus has been shifted towards new energy efficiency requirements for all types of luminaires and components in the general lighting sector. As an important member of the European Light Association, OSRAM is working towards new requirements that, in addition to the primary goals energy efficiency, resource conservation and light quality, will also meet the requirements of the users and can be implemented realistically by the industry.

## A world fit to live in – today and tomorrow

OSRAM offers a wide range of innovative products for sustainable lighting solutions, from components and luminaires to light management systems. In addition to improved efficiency and cost benefits, sustainable lighting offers many other advantages. Light protects, energizes, provides comfort, for example by offering a greater sense of security, and therefore improves our quality of life. And light is fascinating. Developing new solutions for the future, creating sustainable value for our customers and the environment, and introducing them to the fascination of light – that is what inspires us. In the future, digital or connected light will take on a key role for optimum lighting control.

You will find more information on this topic at [www.osram.com/sustainability](http://www.osram.com/sustainability)

## OSRAM Flex Atelier

Discover the world of flexible lighting solutions

Take a stroll through our virtual shop, the OSRAM Flex Atelier, and adapt the shop lighting to your needs.

As a service for designers and architects, we have added enhanced product information across our LINEARlight FLEX® portfolio.

Download the tender texts list at [www.osram.com/ds-tender-texts](http://www.osram.com/ds-tender-texts) or check the individual product pages.

## Architectural spirit

### The fourth dimension of architecture

Extraordinary building concepts are the result of a holistic approach. As an integral part of the architecture, lighting solutions support and enhance the overall visual impression. Thanks to innovative, ultra-flat and flexible lighting solutions from OSRAM, the lighting blends discreetly into the architectural concept of a room and opens up completely new opportunities for creative design.

Thanks to the UltraFlat System, luminaire manufacturers and lighting planners profit from an unprecedented level of design freedom. The currently flattest lighting system on the market with a casing height of only 11 mm allows for the design of extremely slim luminaires. The portfolio consists of ultra-flat DALI LED drivers, perfectly matched light and presence sensors as well as the particularly slim PrevaLED® Linear LED modules in various light colors and lengths.

In addition, the LINEARlight FLEX® system offers maximum flexibility – with a wide selection of different LED modules, the corresponding LED drivers and a comprehensive range of accessories, the so-called Flexessories®. While LED strips are hidden in light coves, suspended ceilings or furniture systems, BackLED® LED modules provide a particularly homogeneous backlighting in light ceilings. This way, light sets up the visual framework for the architecture and takes the overall concept to a new level. In other words, light becomes the fourth dimension of space.

**Make your visionary design come true with ultra-flat lighting systems from OSRAM.**

Thanks to ultra-flat lighting solutions, the lighting blends discreetly into the architectural concept of a room

## Shop/Hospitality

### Sensual experience in shops and hospitality areas

Stationary retail stores have to compete with the high product availability offered by online shops and face fierce competition. Therefore, it is becoming increasingly important for them to create a stimulating shopping experience with new lighting concepts. In the hospitality and hotel business, lighting triggers emotions and creates an ambience that enhances the well-being of the guests.

Miniaturized LED lighting systems open up new opportunities for the subtle integration of luminaires into their environment – in shop as well as hotel and hospitality lighting. Spotlights and downlights are therefore getting increasingly smaller and more efficient, while covering a broad spectrum of applications. The LED modules of the PrevaLED® Core family are ideal for the design of elegant track lights and spotlights. Thanks to a wide choice of lumen packages and light colors, they offer high flexibility and can therefore be used in any area.

The adjustment of the light color to the illuminated products is crucial for the shopping experience. For example, LINEARlight FLEX® POWER LED modules with the special light colors Meat or Veggie White are suitable for the presentation of food. In the hospitality sector, the lighting mood plays a more important role. In combination with the new LED driver families OT FIT LT2 S and OT FIT CS G2, the LED modules LINEARlight FLEX®, LINEARlight FLEX® Tunable White and LINEARlight FLEX® POWER allow you to adjust a great variety of different lighting scenes.

**Create an inspiring atmosphere for customers and guests – with our compact lighting systems.**

# Outdoor

## Smart street lighting with NFC

In modern street lighting, safety and lighting mood have top priority. For cities and municipalities, energy efficiency and easy operation are also of great importance. The new OSRAM LED drivers of the product families OT 1DIM and OT 4DIM NFC meet these requirements and offer even more. Thanks to contactless NFC programming with Tuner4TRONIC®, you can reduce the complexity associated with the application of energy-saving LED luminaires and lower costs for maintenance and stock management.

Street lights with LED technology allow for high energy savings as the brightness and the dimming level, for example, can be adjusted to the requirements. This, however, drastically increases the number of different luminaire types in municipalities, leading to a higher complexity of maintenance and storage. In order to reduce this complexity, OSRAM has developed the intelligent NFC-ready LED drivers of the product

families OT 1DIM and OT 4DIM NFC. These make it possible to use flexible LED street lights that support various lumen packages, dimming modes and dimming levels.

In luminaire manufacturing, the LED drivers can be programmed efficiently with the software Tuner4TRONIC® and the corresponding NFC devices. Moreover, they can be easily programmed via smartphone with the Tuner4TRONIC® Field app, which provides municipalities and assigned installers with a simple way to replace defective LED drivers and extend existing installations – and this without requiring mains voltage.

**Rely on a future-proof solution –  
with our NFC-ready LED drivers.**

Thanks to NFC, municipalities can optimize energy efficiency without additional efforts for stock management and maintenance

HCL solutions focus on humans and the optimal light for their needs

## HCL

### Biologically effective light for balance and well-being

Modern lighting offers more than just optimum visibility. With innovative concepts for Tunable White and Human Centric Lighting (HCL), OSRAM uses the many positive effects of light in order to create more pleasant working environments.

HCL solutions, for example, bring the natural course of daylight and its biological effects into indoor areas. This is achieved by using artificial light with the right brightness and color temperature to supplement the daylight. The interplay of light and room climate creates an atmosphere that has a positive impact on the well-being of humans as well as on their productivity and health. This requires the application of HCL-ready luminaires that allow for melanopically effective lighting.

In combination with suitable OPTOTRONIC® OTi DALI TW LED drivers, the LED modules PrevaLED® Linear Tunable White, LINEARlight FLEX® Tunable White and BackLED® TW Plus provide a high light quality and a wide spectrum of light colors from 2,700 to 6,500 K. Lighting systems from OSRAM can be implemented in installations of any size. Light management systems such as DALI MCU TW, DALI ACU BT or DALI PROFESSIONAL form their centerpiece. Our range of solutions extends from the manual control of single rooms with Tunable White to dynamic daylight- and presence-dependent control in comprehensive HCL applications.

**Improve the quality of life with light quality – with our efficient lighting systems.**

## Industry

### Efficient LED-based industry lighting systems

High ceilings in production and logistics facilities call for lighting components with long lifetimes, wide temperature ranges, high light output levels and a high quality of light for effective working. In order to cut costs while providing high-performance lighting, many luminaire manufacturers today rely on robust LED components and intelligent control technology from OSRAM.

Our extremely reliable and energy-efficient LED system components for the industrial sector save lots of energy and reduce maintenance effort to a minimum – with perfectly matched LED modules, LED drivers and intelligent lighting control systems. With OPTOTRONIC® Intelligent DALI 100 IND and OPTOTRONIC® Intelligent DALI 150 IND as well as the OPTOTRONIC® FIT IND drivers, which are available in mid-2018, OSRAM offers state-of-the-art constant-current LED drivers that have been specially designed for industrial applications, e.g. production areas, warehouses and high-back racking.

In combination with daylight and motion sensors, innovative light management systems from OSRAM make lighting control as easy, modern and versatile as never before. With DALI PROFESSIONAL combined with the DALI PRO Control app, even complex lighting scenarios can easily be realized and controlled via smartphone.

**Develop durable and energy-efficient lighting systems – with our future-proof technologies.**

In industrial applications, the uninterrupted operation of the lighting is of crucial importance

## App control

### Wireless control via smartphone

In the connected world, the smartphone is increasingly becoming a central element. Thanks to versatile interfaces and easy-to-use apps, it also turns into an intuitive tool for intelligent lighting controls. If you would like to switch to lighting control via smartphone, OSRAM offers various simple solutions – for luminaires as well as LED modules. Moreover, all types of installation are covered and easy commissioning via app is also possible in some cases.

With their Bluetooth® interface, the DALIeco BT and DALI ACU BT controllers are ideally suited for the lighting control of small and medium-sized DALI installations via smartphone. Both controllers also support Tunable White luminaires. The DALI PROFESSIONAL light management system is used for installations with over 30 light points.

Furthermore, OSRAM also offers wireless systems that increase flexibility and energy efficiency due to the lack of wiring, e.g. in offices and industrial facilities. In this case, not only the remote control (smartphone) and the light installation are connected, but the luminaire components (controllers, sensors etc.) are also linked to each other in a wireless network.

**Switch now to lighting control via smartphone and make lighting as easy as it gets.**

# Applications

## Office lighting

Focusing both on design and human needs, OSRAM lighting systems provide the basis for modern office lighting. Tunable White (TW) and Human Centric Lighting (HCL) help to improve the well-being and productivity of office workers. To provide optimal simulation of the natural daylight cycle, HCL concepts use area light sources that can be equipped with BackLED® TW Plus, PrevaLED® Linear Tunable White or LINEARlight FLEX® Tunable White LED modules. For the control of TW and HCL, OSRAM offers solutions for any project size, e.g. DALIeco BT, DALI PROFESSIONAL.

These light managements systems also allow for wireless control with smartphones, providing optimum ease of use and reducing installation costs in some cases. A highlight in terms of futuristic design is the UltraFlat system. Combining extremely flat LED drivers with sensors and the PrevaLED® Linear LED modules, it gives unprecedented freedom in the design of slim floor-standing and pendant luminaires, which become unique eye-catchers in any office.

**Turn offices into a source of well-being and inspiration.**

## Retail and shop lighting

In shops and supermarkets, lighting plays a vital role in drawing the customer's attention to selected products or areas. LED technology achieves even more: It improves energy efficiency and creates a universe of colors that stimulate shopping.

The ever decreasing dimensions of spot- and downlights demand extremely compact LED modules, drivers and sensors. Moreover, excellent light quality, the specific color rendering and efficient light management are necessary to display the presented products in the perfect way. In combination with our compact LED drivers, such as the OT FIT LT2 S, the slim LED modules PrevaLED® Core and LINEARlight FLEX® Tunable White provide the perfect light for every situation, from sales counters and cash desk areas to subtle shelf lighting.

**Make shopping an experience – thanks to LED.**

## Hospitality lighting

Intelligent and cost-efficient LED lighting systems combine functional and decorative lighting in hotels, bars, restaurants and wellness centers. For hospitality areas, our product range includes compact system solutions for spotlights and downlights, such as PrevaLED® Core for reception areas and PrevaLED® Flat AC for corridors in hotels. In addition, we also offer flexible LINEARlight FLEX® LED strips for integrated lighting. Due to flexible and individual lighting control, the LED modules and drivers can create the right atmosphere by dividing rooms into different zones, enhancing privacy or relaxation while ensuring that public areas are brightly lit. Tunable White light from warm to cold white and an almost endless variety of colors allow for customized lighting that suits each area. An overall light management system helps you to adjust the light output automatically according to the amount of natural light, achieving highest efficiency and low operating costs.

**Set the right mood for guests with LED light and turn every stay into a special occasion.**

## Art and museum lighting

Lighting systems in museums and galleries have to present the works of art with the optimal brightness, in the right light color and without disturbing glare effects. For these requirements, our LED systems offer a wide range of white and colored light in various light intensities. Our portfolio includes, for example, light engines and modules for spotlights and downlights, the OT FIT Compact LED drivers and the LINEARlight FLEX® LED strips for attractive embedded lighting. With our efficient light management systems, such as DALI PROFESSIONAL and DALI MCU, predefined constant or dynamic scenes can be set very easily and comfortably.

Furthermore, it is possible to control the combination of daylight and artificial light with high precision. The use of sensors opens up additional options to reduce energy consumption by switching on the light only when visitors are present.

**Find the right balance between architecture, costs and energy efficiency.**

## Backlighting and signage

An eye-catching LED backlighting and signage is simply ideal to flexibly design customized solutions for companies and shops. LED solutions provide homogeneous brightness levels for advertisement as well as logos and ensure precise control of illuminated signage applications. Our highly functional and reliable systems, consisting of high-performance LED modules, perfectly matched constant-voltage LED drivers (12V and 24V), various mounting accessories and intelligent light management systems, such as the DALI MCU TW, open up numerous opportunities for indoor and outdoor applications. Both the BackLED® and BoxLED® product families include various LED modules for the brilliant direct backlighting of channel letters and provide even, powerful and efficient illumination in light boxes.

This combination of homogeneous illumination, flexibility and a huge variety of colors gives you the design freedom you need. Perfect support is provided by the LED deSIGNer software, which automatically calculates the exact number of LED modules, ECGs and mounting profile components for a given project.

**Attract great attention with tailored LED solutions.**

## Architectural and facade lighting

Based on cutting-edge lighting technology, the smooth interplay of light and shade highlights distinctive architectural structures to make buildings stand out from their environment.

LED luminaires and modules for outdoor applications, such as the flexible LED strip LINEARlight FLEX® Protect ADVANCED, offer superior efficiency and extreme color stability. They withstand the harshest weather conditions and deliver the energy efficiency and durability required for long-term operation. Professional light management systems allow you to smoothly control colors and energy requirements. After an easy installation of the luminaires and light engines, you can save pre-defined light scenarios and dynamic light sequences and activate them via remote control, smartphone, a central touchpad or a motion sensor.

**Provide LED architectural lighting that presents every facade in the perfect light.**

## Industrial and logistics lighting

The correct level of light is essential in factory and warehouse settings to ensure high productivity and safety. Our perfectly matched system solutions are the ideal choice for the most challenging environments. With cutting-edge LED modules such as PrevaLED® Basic Linear or PrevaLED® Linear G4, they provide durable, high-quality lighting at high and low temperature extremes and over long operating hours, e.g. in trunking systems or water-proof, batten and high-bay luminaires. Our OTi DALI 100 IND, OTi DALI 150 IND and OT FIT IND (available in mid-2018) LED drivers have been designed to meet the special requirements of industrial applications. Efficient and convenient control is realized with sensor-based light management systems.

Combined sensors with a detection range of up to 9 meters and a height of up to 13 meters are available for this purpose. With the DALI PROFESSIONAL light management systems, we offer a perfect fit for any project size.

**Use efficient lighting systems that have been specially designed for industrial use.**

## Smart city and street lighting

In modern street lighting, our smart outdoor technologies ensure easy installation and maintenance as well as energy-efficient operation. With the Tuner4TRONIC® software suite for Windows, the OT 1DIM and OT 4DIM NFC LED drivers from OSRAM can be programmed in a very simple and fast way. Thanks to contactless NFC programming, they allow the easy configuration of luminaires that can be flexibly adapted to different requirements. These flexible NFC luminaires significantly reduce the complexity associated with the use of energy-saving LED technology: They enable cities and municipalities to achieve new levels of energy efficiency with less effort, reducing time and costs of stock keeping and maintenance.

If a luminaire has to be replaced, it is possible to copy the original configuration of the failed LED luminaire and paste the data into the new LED driver via the Tuner4TRONIC® Field app.

**Rely on a future-proof solution with NFC-ready LED drivers from OSRAM.**

## Case study

Glamor at its best – the award-winning “Gold on 27” bar lighting concept – a modern interpretation of Arabian luxury

The “Gold on 27” bar in the only 7-star hotel in the world, the Burj Al Arab, sets new standards in terms of interior and lighting design. The award-winning lighting concept was created with Delta Lighting Solutions and interior designers from Keane Brands.

The lighting planners skillfully used light to accentuate the design elements to perfection: the metallic surfaces, the gold patterns on the walls, the golden sculpture on the ceiling and the illuminated bar shelves.

“Lighting the shelving and work spaces was a special challenge for us because we were not allowed to change anything on the walls. But the wall curves precisely at this point. So the lighting also had to be curved,” says lead designer Patricia López-Yáñez. “We decided to use LINEARlight FLEX® ShortPitch because these dimmable LED strips are very flexible and easy to cut, even into very small pieces.

As a result, we were able to adapt them exactly to the counter and the shelves and achieve exactly the lighting effects we wanted. We used OPTOTRONIC® OTi DALI 75/220 LED drivers from OSRAM because they are so compact that you can install them even in the smallest of spaces.” The extremely small distance between LEDs means that the flexible LED strips provide sufficient illumination.

A warm color temperature of 2,700 K highlights the golden color, and the satinized diffuser softly distributes the light along the back wall of the shelving. Despite the highly reflective metal surface, a diffuse light is produced.

Finally, for the perfect mood, programmable lighting scenes were created for sunset, night and special occasions.

## Light Engine – Spot Downlights

- PrevaLED® COIN 35 DC COB G2
- PrevaLED® COIN 50 DC COB G2
- PrevaLED® COIN 111 DC COB G2
- PrevaLED® CORE Pro
- PrevaLED® CORE Mini

### PrevaLED® COIN

Light is reliable: Quickly connect to the LED age

PrevaLED® COIN products combine effortless and quick installation with easy operation with OSRAM drivers, long lifetime, high reliability and an amazing level of efficiency. Moreover, PrevaLED® COIN is highly flexible due to the easy replacement of the modules. It is an easy and simple solution for MR16 and AR111 form factors.

## PrevaLED® COIN 35 DC COB G2

LED Modules with Integrated Optics and Heat Sinks

### Benefits

- Compact form factor compatible with conventional MR11 lamps
- Precise optical control
- Free from multi-shadow issue with single light source

### Features

- Color consistency < 2SDCM
- TM30 compliant, CRI 90
- High flux output up to 650lm
- Beam angle of 24° & 36°

### Applications

- Retail, shop, restaurant, hospitality
- High-end residential

## PrevaLED® COIN 111 DC COB G2

LED Modules with Integrated Optics and Heat Sinks

### Benefits

- Compact form factor compatible with conventional AR111 CDM lamps
- High color rendering performance, complying with IES TM30
- Free from multi-shadow issue with single light source
- Flexible combination of flux output and beam angle

### Applications

- Retail, Shop
- Restaurant
- Hospitality, Residence
- Gallery and museum
- Office

### Technical Operating Data

1. Nominal performance is measured at steady status when: PL-CN111-COB-1800-xxx-xxD-G2 @ Tp=55°C, PL-CN111-COB-2800-xxx-xxD-G2@ Tp=65°C, @ PL-CN111-COB-4300-xxx-xxD-G2 @ Tp=75°C.
2. Tolerance of measurements for the luminous flux is and efficacy ±5%

**Technical Features**

- Color consistency: < 3 SDCM
- CRI 80 and 90 (TM30 compliant)
- Flux range 1800 – 4800lm
- Beam angle 15°, 24°, 40°, 60°
- L80B50 50khrs at Ta 25°C

## PrevaLED® CORE Pro

COB Light Engines and Modules for Spot Lights, Down Lights and Wall Mounted Luminaires

### Benefits

- High quality of light, complying with IES TM30-15 standard
- Separable COB and holder to improve assembly flexibility
- Single LES 19mm with wide flux range to simplify optics solution
- Industrial standard package size to shorten design lead-time

### Applications

- Retail shop
- Restaurant, Hospitality
- Gallery and Museum

### Technical Operating Data

## Product Code Nomenclature

### Technical Features

- Color consistency < 3 SDCM
- TM30 compliant, Rg 100, Rf 90
- Max. current > 2 x nominal current
- Luminous efficacy up to 160lm/W

## LEFI – Forward Integration Solution

### FLEXIBILITY & QUICK RESPONSE

LEFI is a highly integrated light module solution for indoor applications in integrated with PrevaLED CORE COB, together with optics and heat sink. This is a popular choice as products can effortlessly combine and quick installation with OSRAM drivers provide easy operation, long lifetime, high reliability and an amazing level of efficiency. Moreover, LEFI fixtures come with wide flux range, comprehensive beam angle and CCT Option.

## Highly Integrated Downlight Module - Fixed Angle

### Benefits

- Robust and stylish design with die-cast aluminum housing
- Simple & easy installation
- High visual comfort with glare control (UGR<19)

### Features

- Color consistency < 3SDCM
- TM30 compliant, Rg 100 & Rf 90
- Flux output range 500 - 6000 lm
- Beam angle FWHM at 15°, 24°, 36°, 60°

### Applications

- Retail, restaurant, hospitality
- High end residential

## Highly Integrated Downlight Module - Adjustable Tile Angle

### Benefits

- Robust and stylish design with die-cast aluminum housing
- Adjustable tile angle up to 30°
- High visual comfort with glare control (UGR<19)

### Features

- Color consistency < 3SDCM
- TM30 compliant, Rg 100 & Rf 90
- Flux output range 500 - 1100 lm
- Beam angle FWHM at 24°, 36°

### Applications

- Retail, restaurant, hospitality
- High end residential

## Highly Integrated Downlight Module - Recessed Type

### Benefits

- Robust and stylish design with die-cast aluminum housing
- Simple & easy installation
- High visual comfort with hybrid reflector

### Features

- Color consistency < 3SDCM
- TM30 compliant, Rg 100 & Rf 90
- Flux output range 900 - 3900 lm
- Beam angle FWHM at 15°, 24°, 36°

### Applications

- Retail, shopping mall
- Office, education

## Highly Integrated LED Module - Zoomable Beam Angle

### Benefits

- Robust and stylish design with die-cast aluminum housing
- Zoomable optics for optimal flexibility
- High visual comfort with TIR lens optics
- Simple & easy installation for track & recessed rotatable spotlight

### Features

- Color consistency < 3SDCM
- TM30 compliant, Rg 100 & Rf 90
- Zoomable beam angle range 20°- 40°

### Applications

- Fashion, Retail, restaurant
- Gallery, museum

# Customized light for sophisticated tasks

"Re-Generationenhaus", Brandenburg/Havel, Germany

LINEARlight LED modules are the best choice when it comes to economic and design-oriented solutions for a broad range of possible lighting requirements and interior designs. To name just a few potential application areas: Shops can present their goods in the right light with cabinet and shelf lighting. Offices can find options for orientation lighting in corridors or general illumination in conference rooms. Hotel and hospitality businesses can illuminate corridors and conference zones, create the right atmosphere in ballrooms, provide soft indirect cove lighting in the guest rooms or simply shape a lasting colorful guest experience in restaurant and bar areas. LINEARlight LED modules can even be used in outdoor areas: Our outdoor modules accentuate façades with elegant lighting effects. Using LINEARlight Flex® LED modules, homogeneous and flexible lines of light are easily integrated into architecture, furniture or any other object.

SGL Carbon, Wiesbaden, Germany

### LINEARlight Flex® Diffuse

- Diffused light lines without visible spots
- IP67 protection with high-performance silicone
- Outdoor use possible: UV-resistant and salt & mist proof
- Long operational length per single power feed possible (up to 6 m)
- Increased reliability due to single piece reel-to-reel technology

LINEARlight Flex® Diffuse

### LINEARlight Flex®

- Luminous flux of up to 3850 lm/m

LINEARlight Flex®

### LINEARlight Flex® Protect

- Minimalistic white design with hidden electronics
- IP67 protection rating high-performance silicone for extremely long lifespan and bendability
- Highly UV-resistant
- Salt and mist proof
- Simple contacting due to pre-assembled connector
- Luminous flux of up to 3000 lm/m

LINEARlight Flex® Protect

### VALUE Flex® for private and semi-professional applications

- Simple contacting due to pre-assembled wires
- Many models with IP66 protection rating
- Fine White Binning < 3 SDCM
- Lifespan of up to 50000 h (L70B50)

VALUE Flex®

Easy installation using Flexessories®

Together with OSRAM LED drivers, flexible LED modules from OSRAM make a perfect system match.

\* For conditions and detailed information, see [www.osram.com/guarantee](http://www.osram.com/guarantee).

\*Going forward, G4 will eventually be replaced by G5 uniformity series.

# GinoLED Flex G1

Weather-proof LED strips for high quality homogeneous lighting

## Product features

- 3 SDCM, CRI80
- Large selection of light color temperatures
- IP67 protection for truly outdoor applications\*
- 110°viewing angle per module
- Up to 50,000 hrs lifetime @ tc max

\* IP65 endcap and IP20 connector & endcap after cutting assembly available.

## Product benefits

- 10x10mm Super slim design, best fit for embedded applications.
- Diffuse version, Top/Side emitting, High uniformity without hot spot and dark area
- Customization length to meet customer difference length requirements
- Dimmable by OPTOTRONIC® LED drivers

## Applications

- Outdoor or indoor contour/Border lighting
- Architectural Outline/Decorative lighting
- Cove/Accent lighting
- Signage

## Accessories

- Supporting IP20 Connector, End-cap, track & Clip accessories
- Perfectly matched to OPTOTRONIC® 24 V electronic control gears

\*Due to the special conditions of the manufacturing processes of LED the typical data of technical parameters can only reflect statistical figures and do not necessarily correspond to the actual parameters of each single product which could differ from the typical data; All values are tested at ta25 °C.

## Value Flex® G4

### Benefits

- Energy saving low-power LED flexible strip
- Easy installation with Track
- Multi-Cut-able with SLIMCONNECT system
- Available in warm white and cold white
- 120° viewing angle per module
- Colour consistency < 3 SDCM, CRI 90
- Up to 50000 hrs lifetime @ Tc max
- Dimmable

### Applications

- Hospitality Lighting
- Cabinet Lighting
- Signage
- Architecture lighting
- Wall integration

### Effective solutions with Value Flex® G4 strips

Create the desired lighting atmosphere, set decorative accents, or highlight products: in the blink of an eye with the new generation of the OSRAM VALUE Flex® G4 LED strips. Thanks to improved features, you can design homogeneous lighting with just the right amount of light in a wide range of color temperatures.

VALUE Flex® G4 LED strips bring homogeneous light into narrowest coves and perfectly illuminate every space with a large selection of various light colors.

The product family offers lumen packages from 1000 to 2,400 lm/m with an efficacy of up to 110 lm/W. Thanks to VALUE Flex® G4, OSRAM provides even more options for various applications: just the right solution for comfortable ambient lighting as well as brightly illuminated rooms. The new ShortPitch versions are available as protected (IP66) and non-protected LED strips (IP20): simply ideal to create homogeneous lighting solutions.

Combined with ON/OFF ELEMENT LED drivers, dimmable OTi DALI LED drivers, protected OPTOTRONIC® devices and our extended range of connectors, tracks and covers, you can design the ideal lighting solution for every need.

# Value Flex® Non-Protect G4

## Basic Flex - BF / BFP 400/ 800/ 1000

### Technical Information

#### Benefits

- Energy saving LED flexible strip
- Easy installation with various mounting methods
- Available in warm white 2700K, 3000K, 4000K
- 120° viewing angle per module
- Dimmable
- IP20 & IP66 Version

#### Applications

- Hospitality Lighting
- Cabinet Lighting
- Signage
- Architecture lighting
- Wall integration

#### Technical Features

- Size of printed circuit board (L x W x H):  
5000mm x 8 mm x 2 mm
- Size of smallest unit : 100mm
- Connection possible at the reel end or at the cut points
- 24V Constant Voltage LED modules
- Colour consistency < 3 SDCM
- CRI > 80
- Linear LED strip on printed circuit board with kinds of accessories for easy mounting
- Up to 20,000 hrs lifetime (L70/B50@ Tc = 45°C).

## Technical Features

- Size of printed circuit board (L x W x H):  
5000mm x 8 mm x 2 mm
- Size of smallest unit : 50mm
- Connection possible at the reel end or at the cut points
- 24V Constant Voltage LED modules
- Colour consistency < 3 SDCM
- CRI > 80
- Linear LED strip on printed circuit board with kinds of accessories for easy mounting
- Up to 30,000 hrs lifetime (L70/B50@ Tc = 45°C).

# Flex Accessories

- = Combination options between Flex LED modules and accessories
- = Additionally required accessories, see datasheets for detailed information
- = Combination possible only without cover
- = Full compatibility, tested in recessed conditions including cover at  $T_{amb} = 25^{\circ}C$
- = Compatibility in free-air conditions including cover at  $T_{amb} = 25^{\circ}C$

## LELA Rigid (Light Engine-Linear Application)

LINEAR Rigid Slim Diffuse - G1

BASIC Linear

Accessories

# LINEAR Rigid Slim Diffuse - G1

## Technical Information

### Benefits

- Elegant appearance, soft lighting, super slim design.
- Seamless connection for structure and light
- Surface mount by screw/magnet for easy installation
- Available in warm white and cold white
- 120° viewing angle per module
- Dimmable

### Applications

- Interior decoration.
- Show case & stock shelves.
- Retail & Supermarket.
- Corridor & ladder.

### Technical Operating Data

\*) All Data are related to the entire module.

Due to the special conditions of the manufacturing processes of LED the typical data of technical parameters can only reflect statistical figures and do not necessarily correspond to the actual parameters of each single product which could differ from the typical data.

### Technical Features

- Size (L xWxH): 102/284/603/876/1194 mm x 6.5 mm x 9 mm
- Max. available length to be connected in series: 3,000mm
- Pre-mounted connectors on both terminals for easy connection
- 24V Constant Voltage LED modules
- Colour consistency <4 SCDM
- CRI >80
- Up to 36,000 hrslifetime

## BASIC Linear

Ideal alternative to linear fluorescent lamp source

### Basic description

BASIC Linear series offer reliable and value for money solutions for a variety of general lighting applications. Providing seamless longlife, energy-efficient, and economical lighting alternative to linear fluorescent lamp sources.

- CE marks
- UL Listed
- ENEC Certification

### Features

- Consistent white light < 3 SDCM
- Poke-in connectors for 0.5mm<sup>2</sup> wire
- CRI>80
- Beam angle 120° ± 5°
- 50,000 hrs life

### Benefits

- Efficacy: up to 168 lm/W
- Homogeneous light distribution
- No special connection cable needed
- Self-cooling
- Form factor-according Zhaga book 7
- Normal operation with 350mA, able to overdrive up to 500mA.

### Applications

- Office (workplace illumination, corridor)
- Commercials (Indoor car park)
- Industry (storage, warehouse, retail)
- Public area (corridor, stairs, subway)

## Accessories

PrevaLED® Linear Diffuser and End Cap

### Description (Diffuser)

- Width: 28.5mm
- Height: 22 mm
- Length: 560 / 600 /1150 /1450mm
- Material of UL94-V2 grade PC for safe operation

### Description (Endcap)

- Material: PC
- Dimension: 32.2 mm x 23.9 mm x 12 mm  
(based on the width of linear 20 mm)
- Fast snap on mounting, suitable for tray thickness 0.4mm - 1mm and drilling hole 4 mm

## Light Engine – Industrial / Flood Lighting

GinoLED HO Module ECO

PrevaLED SKY Gen 2 Module

## GinoLED HO\* Module ECO

### Datasheet

The GinoLED is a high power LED module with an integrated sink for optimal thermal management and tailored optical design. The GinoLED lightweight and easy assembly design makes installation much easier. Up to 143Lm/W high efficacy designed to reach more energy saving. GinoLED is an IP65 unit equipped with IP connector for easy installation. GinoLED is the best solution for traditional lamp from 100W to 400W.

#### Benefits

- Tailored optical and thermal design
  - 60°x60° and 90°x90° lens design, adaptation to different mounting heights.
  - The high performance of GinoLED module is attributable to the omnidirectional nature of tree-like fins. Thanks to that, air streams are able to enter and exit from all directions.
- IP65/IK08 protection
  - Self-contained housing with heat sink, no extra protection is needed
- High energy efficiency
  - Up to 143Lm/W high efficacy\*\*.
- Easy for assembly
  - Thanks for GinoLED integrated design, only few step to finish assembly.
- Long life time
  - 50,000hrs

\*\* Mentioned efficacy without driver power consumption.

#### Applications

- Airport, Station, Factory
- Indoor Court, Exhibition Hall, Warehouse

\*HO: High lumen output

## Specification (4000K &amp; 6500K)

The typical values involved in this specification are under the following conditions:

Product category	tp-normal
GL-HO-E 80-XXX-LXXXXX	50°C
GL-HO-E 120-XXX-LXXXXX	55°C
GL-HO-E 150-XXX-LXXXXX	60°C
GL-HO-E 180-XXX-LXXXXX	60°C

Parameter	GinoLED HO Module E					
	GL-HO-E 80	GL-HO-E 120	GL-HO-E 150	GL-HO-E 180		
Typical Module flux	11000 lm	16500 lm	20500 lm	25600 lm		
Typical Module efficacy	143 Lm/W	143 Lm/W	143 Lm/W	143 Lm/W		
Light Output	Optical					
	60° x 60°					
	90° x 90°					
	CCT					
	4000K & 6500K					
	SDCM					
	5					
Typical CRI (Ra)						
80 or > 80						
Lifetime(L70B50@ tp-normal)						
50,000 hours

Mounting		Suspended / wall mounted**				
Optics		Polycarbonate lens				
Module Weight		2.1 kg		2.8 kg		
Temperature	Operating temp. range (ta)*	-30 ... 45°C				
	Storage temp. range*	-40 ... 80°C				
Standard Compliance	IP Rating	IP65				
	IK Rating	IK08				
	Certification	CE CB/CQC/BIS				

**IP65 IK08**  

Due to the special conditions of manufacturing processes of LED, the typical data of technical parameters can only reflect statistical figures and do not necessarily correspond to the actual parameters of each single product. Actual lumen output can be varied due to many factors like lamp factor of LED, input current/voltage, thermal conditions, many other optical tolerance, and measurement tolerance. The data above is for reference only. Please contact Osram sales or marketing staff for advice if customers has any specific demand on particular parameters.

Tolerance of measurements for the color rendering Ra is ±2.

\* Exceeding maximum ratings for operation and storage temperature will reduce expected life time or destroy the LED module. The temperature of the LED module needs to be measured at the tc-point according to EN60598-1 in a thermally constant state with a temperature sensor or a temperature sensitive label.

\*\* Additional accessories are needed for Wall mounted, please contact with sales to get more information.

## PrevaLED SKY G2 Module

### Datasheet

The PrevaLED SKY is a high power LED module with integrated heat sink for optimal thermal management and tailored optical design. The modular design concept of PrevaLED SKY allows for design flexibility by varying the module quantity to achieve the best street lighting solution for difference application from Road lighting to Area lighting. The LED module is available in different color temperature (3000/4000/6500K), offering very long time lifetime for minimal maintenance. PrevaLED SKY is an IP66 unit equipped with M15 IP connector for easy installation and ideal for outdoor applications. \*Product pictures only for reference

### Benefits

#### Tailored optical design

- Special designed lenses optimized the light distribution across the road for different road class requirements and also difference application required Highbay, Lowbay and Area floodlight illumination.

#### Light weight design

- Optimization of thermal design, keep small size, reducing the cost of structural accessories for luminaire level, and also easy for installation for end customer.

#### IP66 protection

- Self-contained housing with heat sink for excellent IP protection, no extra protection is needed.

#### High energy efficiency

- Up to 152Lm/W module efficacy, maximizing system efficiency.

#### Stackable & maintainable module

- Simple screw fixing module allowing multiple module configuration in luminaires.

#### Long life time

- Optimized for extended lifetime and lumen maintenance.

### Applications

- Area illumination for Highbay, Lowbay, Canopy light used for industry and outdoor applications
- Billboard light and Floodlight
- Street lighting for ME1 and ME2 road classes

**Specification (3000/4000/6500K)**

The typical values involved in this specification are under the following conditions:

Driver current	$t_p$ -normal
960mA	75°C
700mA	65°C
450mA	55°C

Items	Parameter	PrevaLED SKY G2		
		Low driven	Typical	Over driven
Light Output*	Driver current	450 mA	700 mA	960 mA
	Typical luminous flux @4000K @ $t_p$ -normal	3200 Lm	4600 Lm	5900 Lm
	Luminous flux range @ 4000K @ $t_p$ -normal	2880~3520 Lm	4140~5060 Lm	5310~6490 Lm
	Optical	150° x 80° T40°S (For Staggered / Opposite mount) 150° x 80° T40°C (For Twin-central mount) 60° x 60° (Highbay) 100° x 100° (Lowbay) 100° x 60° Asymmetric (Floodlight)		
	CCT	3000/4000/6500K		
	Typical CRI (Ra)	>70 (> 80 for 4000K only)		
	Lifetime (L70/B50) @ $t_p$ -normal	50,000hrs	50,000hrs	35,000hrs
Electrical	Typical input voltage	46.7 V	47.1 V	50.0 V
	Input voltage range	44.6~49.6 V	46.1~51.4 V	47.8~54 V
	Module Typical Power	21 W	34 W	48 W

Replacement of Traditional HPS

 <p>3k lm</p>	→	  <p>50W HPS 70W HPS</p>
 <p>6k lm</p>	→	 <p>100W HPS</p>
 +  <p>3k lm 6k lm</p>	→	 <p>150W HPS</p>
 +  <p>3k lm 2 x 6k lm</p>	→	 <p>250W HPS</p>
 <p>4 x 6k lm</p>	→	 <p>400W HPS</p>

Remark: Due to difference luminaires have difference performance, above is only general recommendation on the replacement on the lamp, exact application lighting performance should be evaluate with lighting simulation.

## OPTOTRONIC® LED drivers from OSRAM – reliable and interoperable systems for energy-efficient lighting design

### Versatile LED drivers for different project needs

With a wide range of LED drivers, OSRAM provides you with individual LED solutions for your multifaceted professional and semiprofessional projects. All OSRAM LED drivers are known for their high performance and efficiency, giving you tremendous flexibility for the design of LED luminaires.

No matter whether the job involves indoor or outdoor settings, round or linear luminaires, general or accent lighting – we can help you find the right OSRAM LED driver. The following chapter informs you about:

- Perfect combinations – systems with matching LED drivers and LED modules
- High quality and guarantee – any LED driver that has failed because of a material or manufacturer's fault will be refunded
- OSRAM DALI technology (DALI-2, Constant Light Output (CLO), soft switch-off, Emergency Lighting (EL), Tunable White, Monitoring Data etc.), software and programming
- Design freedom and innovative housing designs
- Product families
  - Features and segmentation of OSRAM LED driver families
    - Constant current, linear shape, indoor application
    - Constant current, compact shape, indoor application
    - Constant current, outdoor application
    - Constant voltage, indoor and outdoor application
- Useful installation and operating instructions (number of ECGs per circuit breaker, permitted number of switching cycles, lifetime of LED drivers and permitted temperatures etc.)

### A perfect combination

Expect more than just components. Expect a perfectly matched system. As one of the world's leading suppliers in the lighting sector, OSRAM provides you with perfectly matched components: innovative LED drivers and LED modules.

### Your benefits

- LED drivers and modules from a single source
- Maximum reliability in system operation
- Only one point of contact in all matters relating to lighting

### Research and development

Providing today what tomorrow needs. Continuous research and development on all OSRAM products promises innovative and open systems with additional user benefits to fulfill the needs of future lighting systems.

### Your benefits

- Compliance with current regulations and in certain cases, conformity with planned regulations
- High energy efficiency in lighting solutions
- The use of standard protocols enhanced by globally unique features

- DALI-2 logo: High inter-operability with DALI control devices and sensors from various manufacturers
- OSRAM's proven quality, technology and guarantee
- High quality of light (low light modulation, CLO)

### Excellent experience with 1 billion installed ECGs

Only those supplying highest quality earn your trust. With up to 100,000 hours at a maximum failure rate of 10%, OSRAM offers an excellent lifetime performance in the market. Thanks to this excellent level of reliability, OSRAM ECGs are not only the choice of leading luminaire manufacturers but also of well-known major users across the world.

Due to their high performance, an increasing number of OPTOTRONIC® LED drivers are also being used in extreme temperature ranges and harsh environments.
